

Amendments to the Specification:

*Please delete previous abstract at page 114 and add the following new abstract:*

A library containing a collection of genetic packages that display a member of a diverse family of peptides, polypeptides or proteins and that collectively display at least a portion of the family, the displayed peptides, polypeptides or proteins being encoded by DNA sequences containing sequences encoding a heavy chain CDR region is described.

A separate replacement sheet containing the abstract is provided herewith as an attachment.
